

The main task of DFL Digital Sports GmbH is the production of media content. Based in Cologne, the DFL Digital Sports GmbH is a 100% subsidiary of the DFL Deutsche Fußball Liga GmbH and produces and publishes media content via a variety of digital platforms on their behalf. This includes production of content for international markets and the implementation of the league's own platforms.

We are looking to grow the development team further in Cologne to develop the next generation of digital football content. As a Senior Web Developer you will form an integral part of the core development team running all our content related web offerings. You'll have the opportunity to be involved across the full product portfolio of football. From creating website templates using current frontend technologies to writing integration modules for 3rd party services to working on an innovation POC. The development team works with continuous deployment, unit testing, agile and other best practice engineering approaches. You'll be given the opportunity to take responsibility, learn and contribute across functional teams. As a part of the wider Product and Technology team you'll have an interest in both the technical solutions and the end user product.

Senior Web Developer (m/f)

Responsibilities

- Development of the digital Bundesliga portals using our FirstSpirit CMS and modern frontend technologies
- Helping integrate the CMS with our standard software systems, in particular with DAM, CRM and PIM
- Iterative improvement of our continuous delivery and continuous deployment processes for CMS content, templates and modules
- Work in a highly motivated development team of internal and external developers using agile methods
- Analyse use cases and help contribute to product requirements
- Collaborate with different functional teams and contribute through development, testing and documentation
- Management of service providers and external as well as internal programmers on a business level

Minimum Qualifications

- University degree (computer science, business computer science, media computer science), training as an IT specialist or equivalent experience
- At least 5 years of experience with CMS based web project, of that at least 1 year with FirstSpirit
- Very good knowledge of Java
- knowledge of web frontend technologies (HTML, CSS, JavaScript)
- Practical skills with Continuous integration, Continuous Delivery, Continuous Deployment and of course unit testing
- Skills in configuring Apache web server, Tomcat, Java memory and GC
- Good experience in agile development with Scrum
- Experience with both SQL and NoSQL databases
- Good English skills, spoken and written

Preferred Qualifications

- Experience with microservices /and REST web services, preferably defined using Swagger / OpenAPI
- Experience with Containerization, preferably Docker

- Knowledge of digital asset management with Celum
- Experience in the development of high-performance, highly available web applications
- Experience with cloud services such as Amazon Web Services EC2, ECR, S3 and CloudFormation or similar solutions

Skills

- Good team player
- Good communication skills both written and verbal
- Adept at solution-oriented work with high autonomy
- Quality focused
- Curiosity for new technologies and techniques
- Desire to be constantly learning and improving
- Ability to constructively contribute to the agile process

Opportunity

- Work in a diverse and multi-skilled team
- Work with a highly advanced software stack
- Learn new skills and gain experience with some of the latest technologies
- Help form the future of digital football

The position is for an initial 2-year period. Occasional work on match days may be required outside standard office days/hours.
